

Dodge Intrepid | 1993-1997 Car Radio Removal

STEP 1:

The plastic dash panel surrounding the radio must be removed. This dash panel simply unsnaps from the main dash panel. The best way to unsnap this trim dash panel is to insert a small flat head screwdriver between the dash panel surrounding the radio and the main dash panel. Slowly and carefully begin to pull the radio trim dash panel out to unsnap.

STEP 2:

The radio is held in with (2) two 10 mm bolts. Remove both and pull the radio to free it from the dash. Unplug (1) black and (1) gray plastic wire harness connectors snapped into the rear of the radio. Unplug the antenna wire. Attached to the rear of the radio is a metal braid strap that is secured with a 10 mm bolt. Remove the bolt and the radio can now be pulled out of the dash.

If your vehicle has the "INFINITY" radio system installed, you will need to unplug the single wire connector attached to the rear of the radio. Pull the radio out of the dash.
